

LESS SCORING ADMINISTRATION, FASTER PUBLISHING

Run the task. Let the website carry the scoring flow.

A simple competition section gives pilots one clear upload route, gives scorers candidate tracklogs automatically, and publishes GAP 2025 results from the same workflow.

One link for pilots

Briefing, QR code, XCTSK download and upload route are easy to share.

Fewer manual checks

Tracklogs are recognised by task time window and location.

Published standings

Task scores and cumulative competition results go live from the scorer workflow.

Example visuals are styled after the current website interface.

SCORING WORKFLOW

BUILT FOR PRACTICAL COMPETITION DAYS

From upload to results without the usual chasing.

The competition section keeps the flow lightweight for pilots and structured for scorers, so organisers spend less time collecting files, naming spreadsheets and re-publishing corrected tables.

Pilot track upload

The public upload form stays intentionally small, so it works at the field and after retrieve.

Upload track

Candidate tracks found automatically

Uploaded files are matched to tasks using the task time window and flying area, then the scorer can accept, adjust or exclude.

Track review				7 candidate tracks
Pilot	Track	Fix window	Status	
Sanne de Vries	task-3.igc	12:27 - 15:18	Matched	
Jonas Vermeer	jv-1607.igc	12:31 - 15:44	Matched	
Mila Bakker	flight.igc	10:02 - 10:51	Outside window	
Tom Janssen	terlet.igc	12:35 - 14:56	Matched	

GAP 2025 scoring controls

Scorers keep control of scoring options while

Public task and competition standings

A calmer scoring desk on a busy competition day.

Task sharing, tracklog collection, candidate matching, scorer review, GAP 2025 scoring and publication all live in the same website section.
