

LESS SCORING ADMINISTRATION, FASTER PUBLISHING

Run the task. Let the website carry the scoring flow.

A simple competition section gives pilots one clear upload route, gives scorers candidate tracklogs automatically, and publishes GAP 2025 results from the same workflow.

Download XCTSK

XCTSK:v1:race:74.2km:TO_TERL

One link for pilots

Briefing, QR code, XCTSK download and upload route are easy to share.

Fewer manual checks

Tracklogs are recognised by task time window and location.

Published standings

Task scores and cumulative competition results go live from the scorer workflow.

From upload
to results
without the
usual
chasing.

The competition section keeps the flow lightweight for pilots and structured for scorers, so organisers spend less time collecting files, naming spreadsheets and re-publishing corrected tables.

Pilot track upload

The public upload form stays intentionally small, so it works at the field and after retrieve.

Upload track

Candidate tracks found automatically

Uploaded files are matched to tasks using the task time window and flying area, then the scorer can accept, adjust or exclude.

Track review

7 candidate tracks

Pilot	Track	Fix window	Status
Sanne de Vries	task-3.igc	12:27 - 15:18	Matched
Jonas Vermeer	jv-1607.igc	12:31 - 15:44	Matched
Mila Bakker	flight.igc	10:02 - 10:51	Outside window
Tom Janssen	terlet.igc	12:35 - 14:56	Matched

A calmer scoring desk on a busy competition day.

Task sharing, tracklog collection, candidate matching, scorer review, GAP 2025 scoring and publication all live in the same website section.
